

□ .

Thank you everyone for joining us today. As you all know, we have gathered today to choose our Mayor, an important person who will have many direct impacts in our lives. I, Ittesat Ithun, present myself as a candidate for the said position in front of you, the people of this locality.

I have lived in this locality for the better part of the last ten years. In the time I have spent here, I have started non-profits and helped build many hospitals and schools in here. The locals have always found me to be of assistance, be it an emotional or financial need. This is the place where I have raised two of my children. I love the people and the land just as much as I love them.

It breaks my heart to announce that I have witnessed many of the people here dying owing to the recent pandemic. Much of it was due to not being able to accommodate patients in the hospitals. I want to ensure that all people living in this locality will never have to face death because of lack

of treatment opportunities. In addition to that, as our children are going through a rough time, and taking a toll on their mental health, I will try my best to arrange counselling at low costs for children and parents alike.

I will develop programs focusing on female hygiene and ensure that all members of the locality are living in a hygienic environment. I also want to improve communications by introducing more internet facilities as the world leans more and more into the digital lifestyle. I also want to ensure that proper medications are ensured for all people alike. Being mayor, I will personally list all the problems that the people are facing and try to address all of them.

I will try to host atleast one meeting every month to discuss ongoing projects, completed tasks and future plans with the people. I want the people to know what is happening and why. Thus, I believe that as I am offering the people a chance to be involved, a chance to elect a leader who takes everyone into consideration, I am deserving of

your most precious votes. I do not want to be the Mayor ~~of the people~~ because of its benefits, I want you to elect the person whom you at your heart believe will be a true and honest leader who respects and values you. By the grace of Allah, may you find that leader in me, your vote will ensure that.

Once again, I thank all the mothers who left their chores, all the fathers who left their work, all the people who have things to attend to but have squeezed in the time to join this discussion. Have a great day! May Allah bless all of you. &
